

An aerial night photograph of Zibo, China. The image shows a cityscape with various buildings, some illuminated. In the foreground, a large, modern building with a curved, perforated facade is lit up, situated near a body of water. The sky is dark, and the city lights create a warm glow. The overall scene is a mix of urban architecture and natural elements like the water and trees.

ZIBO

NO.01 APRIL, 2022

遇见淄博

Dear old and new friends of Zibo,

Greeting! We are so happy to meet you in *Discover Zibo*.

Zibo is a city located in central Shandong Province on the east coast of China. With the pleasant spring coming, Zibo is now deepening its empowerment of reform and opening up to inject more vitality. As a city full of hope, Zibo has enormous opportunity potentials to tap. To help your better acquaintance with this dynamic city featuring “curiousness, eye-catching look, delicacy, recreation and entrepreneurship”, we would like to present this special issue to share with you the opportunity of development and cooperation in Zibo.

This elaborate issue includes two parts, Dynamic Zibo and Link Zibo. It aims to show

you a modern new Zibo with vibrant development, and provide you a platform to exchange cooperation information and explore mutual benefits and win-win collaboration. If you have any story to share or any cooperation opportunity to discuss with us, please feel free to contact us. It is our sincere hope that we can exchange our ideas and cooperation information to make the pragmatic collaboration come true.

As flowers blossom in spring, it is the right time for us to forge ahead. May *Discover Zibo* be a bridge for you to find the beauty, opportunities and highlights of Zibo. Let us start a new mode and write a new chapter of win-win cooperation!

Zibo Insight

Part One

ALL ABOUT ZIBO

Zibo (淄博) is located in the middle of East China's Shandong province, near Mount Tai in the south. It backs on to the Yellow River to the north, neighbors the spring city Jinan to the west, and is adjacent to Weifang and Qingdao to the east.

As a Shandong Peninsula economy opening zone city approved by China's State Council and a "larger city", Zibo has local legislative power. It is also a typical group-style city, with a total area of 5,938 square km and a total population of 4.7 million. ■

Zibo has a long history and brilliant cultural background and is the birthplace of Qi culture. Linzi, the political, economic and cultural center of the Qi state for more than 800 years, is today a world soccer sports source area recognized by the International Soccer Association, and is honored as a "famous metropolis within the four seas".

Zibo is a National outstanding Tourism City. In addition to the Eastern Zhou Dynasty Died Horse Tumuli, the Tian Qiwang mausoleum, the Home of Pu Songling and many other human landscapes displaying the spirit of Qi culture, Zibo offers the beautiful scenery of "South Mountain, North Water", sitting as it does at the border of the middle mountains and north plain of Shandong province.

PART 1 Dynamic Zibo

As a major industrial city of Shandong province and one might say of the entire country Zibo has seen its industry last for more than a century, and is today the country's major oil-chemical industry base and one of its five porcelain capitals.

Zibo is also a State-level new material achievement transformation base and one of the main national production areas for building materials. Since 1992 Zibo has been continually ranked among the 50 comprehensive strength cities of China.

Biomedical Research Institute of Zibo High-tech Zone

Established in 2012, Biomedical Research Institute of Zibo High-tech Zone (Shandong University-Zibo Biomedical Research Institute), serves as a service platform for technological innovation, R&D and professional incubation of medicine and health products. Based on Zibo's industrial chains, it has created a preclinical medicine research platform system from analysis and R&D to pilot test, registration and approval, it totally includes 15 sub-technology platforms and centers and provides pharmaceutical enterprises and health-related industries with a “one-stop” complete technical service from R&D to industrialization. In accordance with CNAs (ISO/IEC17025), GMP and GLP requirements, the institute has established a quality management system for medicine innovation and R&D in line with international norms and standards and obtained CNAs recognition and CMA qualification. It also took the lead in the nation to introduce the internationally renowned information laboratory management system (labvantage platform).

Zibo Langda

Composite Material Co., Ltd

Zibo Langda Composite Material Co., Ltd. was founded in September 2000. The company covers an area of 30,000 square meters, 135 employees and owns reserach and development team with 38 patents. The company achieved the ISO 9001-2000 quality

system certification in 2002. Also the company has license of import and export operation. The company has branches offices in Shanghai, Guangzhou, Mannheim Germany and Los Angeles USA.

The business scope of shafts and rollers including low inertia, high torque carbon fiber drive shaft series; ultra long, high-speed carbon fiber guide roller series; low tension diaphragm reeling roller series; carbon fiber roller series for printing machine single cantilever; magnetic suspension eletric motor rotor reinforced sleeves series.

The company has introduced full sets of piping winding forming and shaft roller processing equipment to ensure producing multi-specification and multi-performance carbon fiber shaft rollers. And it has introduced Belgium COMPOSITE-STAR composite material performance design software and CADWIND composite material shaft tube construction programming software to fully realize the technical strength of trinity of numerical control design modeling, design verification and spatial motion code operation programming. The unique technology and equipments in China has achieved the same level as Europe. At the same time, the company also has various advanced performance testing and inspection instruments for shaft rollers at home and abroad to materialize the comprehensive management requirements by after-sales data of finished products.

Potential Cooperation:
export lithium battery diaphragm
production line lightweight roll; import
carbon fiber material.
